RESPONSE

SIR:

This Response is being filed in reply to the Office Communication mailed February 26, 2007.

The Communication maintains that the reply filed on November 20, 2006 is not fully responsive to the prior Office Action because: "Applicants fail specifically point out the support for amendments such as 'cooling rate of 9,000°C/min or higher' in new claim 21. Applicants argue that said cooling rate is lowest in Table 2. But, expression "or higher" includes cooling rates above 200°C/sec."

The applicants disagree with this position taken fulfile Committee Committee
